About me

Hi, I'm a Front End oriented Full Stack Developer. I'm in love with a good user experience and I'm always willing to help my teammates find a solution. I'm a person who pays attention to detail, very curious and constantly learning new stuff, willing to share what I've learned with others. I have knowledge in technologies such as HTML, CSS, JavaScript, React, Redux, Node, Express, PostgreSQL, Sequelize, Git and the agile methodology SCRUM.

Projects

Game Search   Full Stack Developer

React | Redux | Node.js, Express | PostgreSql | Sequelize | CSS

Development of a Single Page Application about videogames thought as a library using information from an external API and a local database. It allows the user to search games, filter, sort them and create a new title in the database through a controlled form. Technology stack: HTML, CSS, JavaScript, React, Redux, Node, Express, Sequelize and PostgreSQL.

Amadeus - Music E-commerce   Front End Developer

MongoDB | Express | React | Node.js | Material-UI

Team development of a complete E-commerce app. Used agile methodologies with daily meetings and weekly sprints with a Product Owner to present our progress. Features: CRUD for products and catalogue, Administration of the shopping cart and purchase orders, Integration of payment gateway (Mercado Pago), Transactional email delivery (Nodemailer), Authentication and authorization (Auth0) Technology stack: Javascript, React/Redux, Material UI, Node JS, Express JS, Mongo DB.

Education

Henry Bootcamp   *Mar 2021 - Oct 2021*
Full Stack Web Development
Bootcamp with more than 700 hours of intensive learning where I learned some of the most wanted technologies.
